CLEAN HANDS

Project Profile

COVID-19 Back To School is upon us and as we prepare for school re-opening we have to be mindful of some key essentials.

Most importantly the Clean Hands Project aims to keep all learners and educators safe from contracting Corona Virus by minimizing the sharing of some of preventative solutions like soap and sanitizer.

The call to regularly wash our hands or sanitize continues to be broadcasted. In response, RISE has launched the Clean Hands project to support hand washing hygiene at schools.

Clean Hands aims to provide soap and soap dishes to school children in Eswatini especially vulnerable children including orphans and Persons With Disabilities (PwD). We also welcome sanitizers as well.

We appeal for your generosity by making a donation towards the purchase of these items which will also include the distribution of the soap items to the school children around the country.

Please share the Clean Hands project with your family and friends as the more soap items we can support with the more lives we can save.

All donations will be recognized and reported on accordingly.
